 +1 (647) 282-4083

Analytical and adaptable technology professional with experience developing modern web applications, supporting digital transformation initiatives, and collaborating with stakeholders to solve complex business and technical challenges. Skilled in problem-solving and communicating technical concepts clearly to both technical and non-technical audiences. Proven ability to work effectively in Agile team environments while managing multiple priorities and delivering client-focused solutions. Passionate about emerging technologies, continuous learning, and leveraging technology to drive operational improvement and modernization.

Technical Skills

Programming Languages: C/C++, JavaScript/TypeScript, Python, PHP, C# .Net

Databases: MySQL, Microsoft SQL Server

Web Development: Vue, Angular, HTML, CSS, REST APIs, Bootstrap 5

Tools: Git, Docker, Composer, Visual Studio/VScode

General Software: Microsoft Suite, Microsoft Power Platform, Azure Devops

Project Management: Confluence, Jira

Operating Systems: Linux, Windows

Technical Experiences

IT Analyst (Information Management and Technology Directorate)

Treasury Board of Canada Secretariat, *Ottawa, ON*

Dec 2024 - Dec 2025

- Developed and maintained modern web applications using .NET, JavaScript, and Azure DevOps in Agile environments.
- Supported modernization initiatives by assisting with the migration and enhancement of legacy applications and databases.
- Performed SQL-based data analysis and database updates in response to operational and stakeholder requirements.
- Resolved application issues and implemented system improvements to enhance application reliability and user experience.
- Collaborated with internal stakeholders to understand business needs and translate requirements into technical solutions.
- Designed proof-of-concept applications using Microsoft Power Platform to support digital transformation initiatives.
- Contributed to cross-functional projects focused on improving operational efficiency and technology adoption.

Full Stack Developer

BizZone, *Gormley, ON*

May 2022 - Dec 2024

- Contributed to the development and enhancement of web applications using PHP and JavaScript/TypeScript technologies.
- Managed and validated client data imports using MySQL, ensuring data accuracy, integrity, and security.
- Diagnosed and resolved technical issues reported by clients, improving platform performance and user satisfaction.
- Developed custom RESTful modules and integrations to address client-specific business requirements.
- Designed and implemented analytical dashboards and data visualizations to support client reporting and decision-making.
- Built responsive and interactive web interfaces using Vue, Angular, HTML, CSS, and Bootstrap 5.
- Led the refactoring and modernization of legacy modules to improve maintainability and system scalability.
- Collaborated with team members in Agile workflows while maintaining project documentation in Jira and Confluence.
- Produced technical documentation and knowledge-transfer materials to support cross-team collaboration and onboarding.

Professional Certifications

Microsoft Certified: Azure Fundamentals

- Completed in 2024
